Art Unit: 3632

This the third office action for serial number 09/812,853, entitled Tilting Support Device Having Damping Device, filed on March 21, 2002.

Allowable Subject Matter

The indicated allowability of claims 11 and 14 are withdrawn in view of the newly discovered reference(s) to Arakawa. Rejections based on the newly cited reference(s) follow.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the damping fluid must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3632

Claims 11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Arakawa 4,893,522. Arakawa discloses a object (housing where 14 is attached) with a shaft (3'), leg (B, figure 8) with sleeve (1' which is attached via 12'), a means for dampening including damping fluid (5) and a rod (the small rod-like member that engages the top of the shaft close to element 3'; see figure 11).

Allowable Subject Matter

Claims 12, 13, 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
